

Our fry packaging is specially designed to offer a better operator and consumer experience. The front scoop promotes easier portion control to limit overfilling. When placed in the bag, our stand-up design allows the operator to easily configure multiple items, preventing the fries spilling out.

Fry packaging is great for other food as well, including pretzel bites, popcorn chicken, mozzarella sticks, and delicious dessert items. This popular package can be seen in quick-service restaurants, university cafeterias, and concession stands where dry items are served in an open container.

Sustainability

- Paperboard is made from wood-based fiber, a renewable raw material
- Fiber used meets the Sustainable Forestry Initiative® (SFI®) Certified Sourcing standards, ensuring that it comes from sustainably managed forests
- This product is recyclable only in the few communities that have appropriate recycling facilities
- Free of intentionally added PFAS

Operational Efficiency

- Can be used as a scoop for efficient filling and portion control
- Stackable or fold-flat designs take up minimal back-of-house storage space
- Made in the USA

Consumer Experience

- Easily stands up in a bag or can lie flat on a tray
- Design ensures the food stays in the container and doesn't spill, a common problem with paper fry bags
- Available in kraft color or custom print by special order
