

MARKSMAN™ 30

Semi-automated Wrap carton Locking System

MARKSMAN™ 30

Cans | Bottles | PET

For an operation needing to produce wraps at a higher rate than our manual machine option. The operator feeds product and cartons into the machine and the packs are completed automatically. Maximum production rates will be up to 25 packs a minute. Multiple diameter and height ranges for cans, glass and PET bottles can be accommodated.

Machine Features

Standard

- GPI standard lock

Frame

- Painted hot rolled steel with corrosion resistant components

Guards

- Enclosed guarding with jam gate sensors at product loading area

Optional

- Casters for mobility
- Extension legs
